The detrimental effects of this constant pressure on individual health and productivity cannot be overlooked and merit thorough examination. (这种持续压力对个人健康和生产力造成的损害不容忽视，值得彻底检视。)

5.2.3.3 深入分析(必要!)

表明观点里一般局限于个人层面，这时可以上升到社会层面(不要把过错都推给个人)，或者从多个角度分析个人层面的影响，不能完全套话。

社会:

Beyond individual factors, it can be **primarily** attributed to a social climate that overvalues utility and encourages/fosters excessive competition and comparison among individuals by taking credits as the sole criterion for social recognition.

最好能将It具体化使其衔接更紧密，比如this hesitation(2018选课)，当然用mindset/tendency/dilemma也行。
也可能用which puts too much emphasis on ... / undervalues quality and intrinsic worth

再转个人：

Admittedly, the social environment is not without its flaws, posing obstacles for individual growth. Yet this should **in no way justify our tendency to shrink back from** challenges and self-improvement.

这里用shrink back from替代dodge/avoid/escape。后面最好衔接具体语境词，比如18年用demanding courses. (难度大的课程)。整个句子也可以直接连接起来：Although..., this ...

备选：While the social environment does present certain problems, it should **by no means** serve as an excuse for complacency or inaction.

分析完毕后，下文就可以号召、写做法、拍马屁了

5.2.3.4 再次联系图画(可选)

考虑到其余部分已经很多字了，这里一般点一下即可：

The **exemplary figure** portrayed in the image **exerts** a profound/transformative and sustained influence that markedly **cultivates intrinsic motivation** among students.

主语可换为：scenario/policy / presented data.

data做主语时谓语可换成：indicates that ...(action) has exerted...从而复用上句模板。

motivation后面可以加toward lifelong learning / to maintain regular physical activity / to explore and adopt innovative products / to pursue academic excellence.

备选：

1. 两幅图

A particularly vivid case in point is graphically illustrated in the left picture, which effectively captures **the pervasive phenomenon of digital distraction and its impact on real-world engagement through its symbolic imagery**, thereby setting the stage for deeper analysis.

pervasive phenomenon可替换为urgent social trend/specific scenario

具体情境还有：environmental degradation and the consequences of human negligence

2. 单幅图

This seemingly simple scene compels us to scrutinize **the underlying/root causes driving this pervasive phenomenon**, such as... The implications of this trend for *interpersonal relationships and individual well-being* **warrant serious consideration**. Consequently, exploring potential measures to mitigate the negative effects of *smartphone overuse* becomes **imperative**.

This **powerful visual metaphor** raises critical questions about **the implications of our digital habits on interpersonal relationships**.

phenomenon可以换成具体情境，如：detachment

This **evocative image underscores/highlights/demonstrates/indicates/points to/reveals** the need to **investigate the societal and economic forces fueling**(助长) *this pervasive sense of urgency and exhaustion*(紧迫感疲惫感).

5.2.3.5 解决方案

In light of this, it becomes imperative to explore [viable/concrete/comprehensive/effective solutions/strategies] to [mitigate the negative effects/harness the potential benefits/address the root causes] (减轻负面影响/利用潜在益处/解决根本原因). 使用时可将negative换成具体词, 然后接of..., 如mitigate the isolating effects of technology overuse. 如果上文还在说图画这里就用Confronted with this vivid representation.

embrace various challenges as opportunities for growth and self-improvement.

3. 强调行动(坏)

at will = recklessly 随意地

7 专题

7.1 AI

7.1.1 词组

AI: artificial intelligence(以下文段为简洁起见均用缩写, 请结合实际判断是否可以使用缩写)

interactive academic consultations 交互式学术咨询

offer unprecedented scalability in knowledge delivery在知识传递方面提供了前所未有的可扩展性

7.1.2 开头段

🔴 机遇: The **advent** of AI has **profoundly** reshaped campus life, influencing everything from **personalized**(个性化) study plans to AI-assisted information **retrieval**(信息检索), **thereby integrating seamlessly into**(从而无缝融入) students' daily routines. This rapid integration presents **both unprecedented opportunities and considerable challenges**, particularly for university students preparing to enter an AI-driven world.

In today's tech-driven era, those proficient in digital skills gain a competitive advantage in learning, careers, and social engagement, as digital competence has shifted from a complementary ability to an essential foundation for navigating modern society.

7.1.3 主体段

7.1.3.1 优势

✦ 赋能: AI **amplifies** human ingenuity, **transforming once-impossible visions into tangible realities**. AI放大了人类的聪明才智, 将曾经不可能的愿景/构想变成了可触可及的现实。

解放: By automating(自动化) repetitive tasks, AI liberates(解放) us to focus on creativity and **higher-order** thinking(更高层次的思维).

辅助: AI serves as a tireless assistant, handling mundane(单调的) tasks and freeing human minds for creative and strategic endeavors.

7.1.3.2 劣势

【深度思考】 While AI enhances the efficiency of academic research and **permeates** everyday scholarly tasks, students must **guard against** permitting critical thinking to **yield to** algorithmic **shortcuts**(算法捷径).

guard against: 防止。yield to: 屈从于=give way to。permit sb to do: 允许。

【深度思考】 When algorithms **devour/erode** our capacity for critical thinking, progress sails like **a ghost ship toward mirages**. 当算法吞噬思考力, 进步就像驶向海市蜃楼的幽灵船。

【决策不透明】 Much like **navigating with a faulty compass**, the opaque decision-making processes of AI systems make it challenging to trace the origins of errors, potentially allowing mistakes to persist and **impeding**(阻碍) effective corrective measures(纠正措施).

【依赖】 As artificial intelligence assistants become increasingly **prevalent/ubiquitous** in our daily lives, we find ourselves ever more tightly **tethered** to the information they provide, which can be as misleading as it is valuable.

be tethered/bound/confined/attached to, be dependent on: 依赖

7.1.4 结尾段

平衡: In conclusion, while AI has **undeniably** brought significant advancements to education, enhancing personalization and efficiency, it also presents challenges that deserve careful consideration. Therefore, it is essential for students to harness(控制并利用) the benefits of AI thoughtfully, ensuring that these tools serve to **complement** traditional learning methods rather than replace them. By maintaining a balanced approach, students can continue to develop essential critical thinking and problem-solving skills, preparing them for a future where human insight and technological advancement go hand in hand.

会提问: True education occurs not when machines provide answers, but when humans persistently ask better questions.

7.1.5 示例1-以缺点为主

[AI+教育] 定制化、即时; 独立思考、情感互动、隐私、不平等。

AI has significantly transformed education, offering numerous benefits to students. AI-powered tools provide **customized learning pathways**(定制化学习路径), enabling students to learn at their own pace and according to their individual needs. These technologies also offer immediate feedback, helping students identify and correct mistakes **promptly**(及时地). Furthermore, AI can assist in developing critical thinking skills by presenting challenging problems and scenarios that encourage analytical thinking.

However, despite these notable(显著的/crucial) advantages, it is **imperative**(必要的) to acknowledge the potential drawbacks **accompanying** the integration of AI into education. Over-reliance on AI tools may **inadvertently**(无意间) diminish students' capacity for independent thought and problem-solving, as dependence on automated assistance could undermine critical cognitive engagement. Additionally, AI systems **inherently**(天生地) lack emotional intelligence and human interaction, **rendering**(使得) them incapable of providing the encouragement and personalized support that human educators offer. Such interpersonal connections are essential for students' social and emotional development. ✦ **Equally concerning are the privacy implications**(倒装句), **given**(因为) that AI applications often necessitate(需要) the collection and analysis of extensive personal data, thereby raising questions about privacy and data security. **Perhaps most critically**(可能最关键的是), the implementation of AI in education may exacerbate existing **inequalities**, as **disparities**(差异) in access to essential technologies and resources can hinder **equitable**(公平的) learning opportunities for all students.

In conclusion, while AI presents promising opportunities to enhance educational quality, it is essential to **approach**(处

理) its integration thoughtfully(认真地), ensuring that it **complements**(补充) traditional teaching methods and addresses the associated challenges(解决相关挑战) to provide equitable and effective education for all students.

这里倒装句是表语前置引起的完全倒装, 表语+系动词+主语, 相当于The privacy implications are equally concerning. 还可以改为: Equally concerning are the privacy implications arising from AI applications, which often necessitate...

更生动的同义表达: AI systems inherently lack the human touch(人情味) — they can't offer the kind of personal encouragement a teacher gives when a student struggles, nor can they **pick up on**(注意到) **subtle cues**(细微的线索) like a **frustrated sigh or hesitant body language** to adjust their approach.

7.2.5 压力

undue/intensify academic pressure 过度的adj/加剧v

7.2.6 挫折

When students fail an exam, it's **inherently human** to feel disappointed or even regretful, but what truly matters is how they **bounce back/(pick themselves up)** and learn from the experience. Embracing a growth mindset allows them to view setbacks as opportunities for improvement, fostering resilience and determination.

Ultimately, it's not the failure itself that **defines** them, but their response to it that shapes their future success.

7.2.9 终身学习

lifelong/continuous learning: 终身学习, keep up with the times: 与时俱进, lag behind: 落后

Given the breathtaking pace of technological advancement, failure to engage in continuous learning will **swiftly render us obsolete** in this rapidly evolving world.

7.2.10 示例1-过程拆分

To increase the likelihood of success, one should **set realistic goals** and work **persistently** towards them. **This principle holds true because** unrealistic ambitions often lead to frustration, **whereas**(但是) attainable targets foster motivation and measurable progress. Furthermore, breaking a larger goal into smaller tasks can offer **regular feedback and a sense of accomplishment**, which helps sustain enthusiasm and momentum throughout the process.

Moreover, persistent effort **bridges the gap between goals and achievement**(架桥). For instance, a student aiming to master a complex subject within a month may feel overwhelmed; however, by breaking it into weekly milestones and receiving regular feedback, they build confidence through progressive accomplishment. This approach transforms **daunting**(令人畏惧的) tasks into manageable steps, thus sustaining motivation. Thomas Edison's thousands of experiments before inventing the lightbulb further **exemplify how unwavering commitment transforms setbacks into stepping stones**(坚定的投入化挫折为垫脚石). Without such **resilience**, even well-designed plans **remain** unfulfilled dreams.

Therefore, combining practical goal-setting with **unceasing** effort is essential. Only by doing so can individuals **navigate challenges**(应对挑战), reinforce progress through continual feedback, and ultimately attain truly fulfilling achievements that stand the test of time(经得起时间的考验).

Graduates at the Crossroads

The illustration **vividly depicts** a group of graduates standing at a crossroads, confronted with multiple **divergent**(分叉的) paths labeled "job seeking", "postgraduate entrance exam", "studying abroad" and "entrepreneurship." This  **thought-provoking** image **reflects/highlights** the **diverse**(多元化的) opportunities available to contemporary graduates, yet it also **implies/indicates** the challenges of decision-making in an era of abundant possibilities.

The symbolic message lies in the imperative of strategic foresight. **Following** years of academic training/cultivation, some graduates may prioritize applying knowledge through employment, while others pursue advanced degrees to **deepen their expertise**(完善专业知识). Studying abroad provides invaluable cross-cultural experiences, and entrepreneurship exemplifies/represents the courage to innovate. However, the key is not merely to choose but to **align** decisions **with**(使决策与...一致) personal aspirations and societal demands. To navigate(应对) this intricate landscape, graduates must cultivate adaptability: acquiring core competencies through rigorous scholarship, staying informed about global trends, and embracing uncertainties with resilience.

In my perspective, the multiplicity of choices can be considered  **a double-edged sword**(双刃剑)/a mixed blessing(喜忧参半的事). While it empowers individuals to customize(定制) their futures, it also requires critical self-awareness. Success **hinges not on**(取决于) the path itself but on the dedication to thrive within it. Write a letter of about 100 words to the president of your university, suggesting how to improve students' physical condition.

Dear President,

I am writing to propose **feasible** strategies to improve students' physical health, which **is integral to** their academic success and **holistic development**. Currently, sedentary(久坐不动的) lifestyles and academic pressures **undermine**(逐渐损害) student wellness. **In light of the above**, I'm pleased to present three practical and effective recommendations.

Firstly, **expand recreational infrastructure** by upgrading gym facilities and adding outdoor fitness zones. This would **incentivize** regular exercise. Secondly, organizing regular campus sports days and outdoor group activities would encourage peer engagement and active living. Finally, implementing a campus-wide wellness competition(健康竞赛) with **incentives** such as **trophies** or certificates would encourage **ongoing participation**.

These **initiatives** would not only enhance physical well-being but also boost academic performance and **mental resilience**. I appreciate your time and consideration of this proposal. I am confident that under your esteemed leadership, our university can set a **benchmark** for student health and vitality.

Yours sincerely,
Li Ming

You are going to host a club reading session. Write an email of about 100 words recommending a book to the club members. You should state reasons for your recommendation.

Dear Club Members,

I hope this message finds you well. With our upcoming reading session approaching, I am delighted to recommend Ernest Hemingway's timeless classic, *The Old Man and the Sea*.

This masterpiece profoundly moved me through its vivid portrayal of resilience. The protagonist Santiago, despite enduring 84 days without a catch, ventures into the sea alone. His relentless struggle against a colossal marlin and subsequent battle with sharks epitomizes the indomitable human spirit. Though he ultimately loses the fish, Santiago's unwavering perseverance in the face of overwhelming adversity offers a powerful metaphor for our academic challenges.

I believe this novel will inspire us to confront obstacles with courage. Its profound themes of dignity and endurance are particularly relevant to our journey as students. I eagerly anticipate discussing its insights with you all.

Yours sincerely,

Li Ming

The illustration poignantly depicts a gathering where individuals are engrossed in their mobile phones, oblivious to face-to-face interaction—a scenario both commonplace and concerning.

While smartphones bridge geographical divides, their pervasive use ironically erodes authentic human connection. The devices themselves are neutral; however, excessive reliance on digital communication diminishes our capacity for in-person dialogue. Emojis and text messages, though convenient, often replace nuanced emotional expression, gradually impairing our ability to articulate feelings without technological crutches. Should this trend persist, we risk forfeiting essential social skills.

Thus, smartphones epitomize a double-edged sword. To mitigate their detrimental impact, individuals must consciously prioritize real-world engagement. Setting aside devices during social interactions fosters richer communication, where spoken words carry warmth and authenticity unmatched by digital exchanges. Embracing this balance ensures technology enhances, rather than supplants, human bonds.

Ultimately, part of Beijing's charm is that the city itself is the attraction. I encourage you to wander without a strict agenda—sometimes the most memorable experiences are found not in the guidebook, but in the unplanned moments of discovery.

The following chart vividly illustrates the diverse purposes of university students engaging in mobile reading. Knowledge acquisition **accounts for** the largest proportion at 59.5%, followed by passing the time and **accessing information** at 21.3% and 17.0% respectively, and finally other purposes **comprise** a mere 2.2%.

These data **underscore**/highlight/indicate a pronounced inclination/tendency among students to use mobile reading for

Therefore, it is essential to strike a balance between academic pursuits and recreational engagement in mobile reading. Additionally, since prolonged screen time may **adversely** affect eyesight, regular breaks are **imperative** to protect eyesight.

In a nutshell, **given** its **unparalleled** convenience and accessibility, mobile reading has become an integral part of students' daily lives. Dear Li Ming, I've got a class assignment to make an oral report on an ancient Chinese scientist, but I'm not sure how to prepare for it. Can you give me some advice? Thank you for your help. Yours, Paul

Regarding your request for advice on your upcoming oral report about an ancient Chinese scientist, I would be delighted/pleased to offer some suggestions.

A good starting point would be selecting a notable figure, such as Zhang Heng or Zu Chongzhi. Once you have selected a scientist, I recommend investigating his life story, major contributions and historical impact through reliable sources like school library and academic websites. This research will **provide a solid foundation for** your presentation. To **bring the story to life and engage your audience**, consider incorporating clear visuals(视觉材料) or presenting a compelling anecdote to illustrate the scientist's work effectively. For instance, exploring the challenges they faced or the profound influence of their invention could **add both depth and intrigue to your presentation**. Although it may **sound like a cliché**, speaking clearly and confidently is crucial to delivering an effective presentation.

With these elements in place, your report will be both **informative and engaging**(吸引人的). Should you have further questions, please feel free to reach out. I'm willing to help you select a scientist, organize the presentation structure, or review a draft. I wish you the best of luck with this project.

The thought-provoking picture presents a scenario in which a resident stands adjacent to their home, gazing at a newly built and well-maintained park **adorned with** luxuriant greenery and a neat walkway, and exclaims, "This little park right by our doorstep is absolutely marvelous!" **Complementing this vibrant scene**, the bar chart clearly shows a substantial surge in the number of parks, rising from 406 in 2020 to an impressive 670 in 2022

Taken together, the image and the data **convey a shift toward people-centered urban development**. Beyond mere beautification, parks serve as accessible and affordable venues for physical exercise and social interaction and act as green lungs that improve air quality and relieve/alleviate citizens' stress. **At its core, this scenario serves as a compelling reminder that authentic urban progress is measured not merely by quantitative expansion, but by the qualitative enhancement of residents' lived experience.** The chart shows a steady increase in park numbers, while the picture reveals residents' genuine satisfaction. This combination indicates that what truly enhances well-being is not simply the aggregate scale of public facilities but their **accessibility, quality and the tangible comfort** they bring to daily life. **The people-oriented spirit embodied here is profoundly significant** and deserves full recognition and sustained effort because it aligns with the broader goal of enhancing livelihoods and happiness.

To build on this promising trend and sustain momentum, concerted action at all levels is imperative. The government should establish forward-looking policies and ensure their effective implementation so that parks become well-maintained assets rather than short-lived projects. Meanwhile, the media and social institutions ought to take the lead in **enhancing public awareness and cultivating a sound social environment**. Above all, citizens should make active use of these parks for regular

exercise and social activities, thereby ensuring that facilities are fully utilized and cared for. **Ultimately, true urban progress is rooted in the sustained improvement of citizens' everyday quality of life, a goal reflected in both rising statistics and heartfelt appreciation.**

年份	空调(台)	洗衣机(台)	电冰箱(台)
2014	75.2	83.7	85.5
2017	96.1	91.7	95.3
2020	117.7	96.7	101.8
2023	145.9	98.2	103.4

The table presents data on the average number of major durable goods—air conditioners, washing machines, and refrigerators—owned per 100 households(每100家) in China between 2014 and 2023. It shows a consistent increase in the ownership of these items over the past decade. Specifically, the average ownership of air conditioners per 100 households surged from 75.2 units in 2014 to 145.9 units in 2023,while that of washing machines increased from 83.7 to 98.2 units and refrigerators from 85.5 to 103.4 units.

This upward trend can be attributed to several factors. First, sustained economic growth has raised household incomes and expanded purchasing power. Second, technological advances and economies of scale have played a crucial sole in reducing the cost of production, making appliances more affordable and higher in quality. Third, urbanization and shifting lifestyles have heightened demand for convenient, time-saving household devices. In addition, government measures that stimulate consumption, such as subsidies, tax incentives, and improved distribution, have expanded access for middle- and low-income families.

In conclusion, the growing in the ownership of household appliances reflects tangible improvements and steady progress in China's living standards. With higher disposable incomes, continued technological progress and supportive policies, more families are enjoying the convenience and benefits of modern appliances, thus enhancing overall quality of life.
